

## Table of Contents

Sr. No.	Contents	Pages
1.	Leveraging Parallel Programming for Improved Performance of Computational Algorithms  <i>Deepak Parashar, Pankaj Rana</i>	1-5
2.	Evaluating the Features and Performance of Parallel Programming Languages  <i>Varun Kakar, Vijya Bhandari, Ravindra Pratap Singh</i>	6-10
3.	Implementation of Parallel Interface for Microprocessor Trainer: Design Considerations and Benefits  <i>Dr. R.P. Joshi, Parul Kansal</i>	11-15
4.	Exploring the Power and Versatility of Python: A Comprehensive Overview of a General-Purpose Programming Language  <i>Vivek Rastogi, Mamta Arya</i>	16-20
5.	Utilizing a Hierarchical Volunteer Computing Approach for Multi-Level Parallel Processing via the Web  <i>Dr. Durgesh Singh Songera, Anshuman Mishra, Ajit Das</i>	21-31

Table of Contents

Sr. No.	Contents	Pages
1.	Lab Allocation in Education <i>R. M. Patil, Tohidealam Firoj Nadaf, Aman Chandso Momin, Rakib Rafik Momin, Aabid Yunus Mulla</i>	32-38
2.	A Framework for Collaborative Parallel Programming <i>Swapna Kodileshwari</i>	39-48
3.	A New Parallel Programming Language for High-Performance Computing <i>Deepak Ganguly, Roshni Tyagi</i>	49-67
4.	A Performance Analysis Tool for Parallel Programs <i>Naina Talwar, Jyoti Raut</i>	68-76
5.	A Survey of Parallel Programming Languages and Tools <i>Shridhar Shiradwade</i>	77-82
